DETAILED ACTION

Non Final Rejection

1). The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2). Claims 1 to 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Paldino (U.S. 5,694,713) in view of Bell (U.S. 5,433,010).

The primary reference discloses an adjustable laser sighting system comprising a laser light beam source (item 36), an aperture window (item 28), a cylindrical housing (item 90), an adjusting ring (item 30) rotatably connected to said housing, the said adjusting ring consisting of a cam / eccentric bore feature (item 30, Column 4, lines 1-49) with a rear laser aperture (item 72), relating to claim 2, the reference discloses the said adjustment ring connected / fastened to the said housing by item 32, relating to claim 3, the said adjustment ring includes a shoulder detail (item 40), relating to claim 4, the said

light emitting source is fastened to the said housing through laser tube item 42, relating to claim 5, the reference discloses that the said adjusting ring, item 30, is shown in Figure 4 with a knurled exterior surface and includes that the said housing, item 90, includes a cam ring detail item 52).

The reference discloses the claimed invention except for the detail of an eccentric bore of the adjustment ring, item 30. The secondary reference discloses that it is well known in the art to provide optical gun sights with adjustment rings with eccentric bores. It would have been obvious to one of ordinary skill in the art at the time of the invention to have incorporated in item 30 of Paldino, the detail of Bell, items 24, 25, shown in Figures 7A-7J, in order to provide the user with an infinite number of adjustment combinations as stated in Bell, Column 2, lines 17-30.

3). The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
